Read me.

Thanksfoe watching!!!

Hi, you meet me in Tik-tok I make a short video in this platform, you know, in my profile I design and teach ux and web design.

So, in this exercise you practice more basic labels in html and CSS flexbox.

I hope you like this exercise and more practice in the short future, I like the web design and frontend, in my profile you found tips of web design, front end and ux design, but don´t forget my tips of project whit methodology PMO, this methodology is cool, and the methodology agile is more perfect for projects ux and ui design.

For example, in this exercise you found little examples of animation whit keyframes only whit css, and the structure whit Flexbox CSS.

I will wait to my channel in YouTube, and Tiktok.

See you.
